The Local Agency Investment Fund (LAIF) balance \$18.6 million with an average monthly yield of 0.290%. During the month of May the City's LAIF account only included the set aside payment for the TRAN payment — activity detailed on page 3 of the Investment Report. The LAIF ending balance as of May 31, 2015 was \$50 million. The aggregate investment portfolio balance on April 30, 2015 was \$179,137,861. As of May 31, 2015 the ending balance is \$181,060,423 resulting in an increase of \$1.9 million from the previous month.

**Liquidity of the Portfolio**

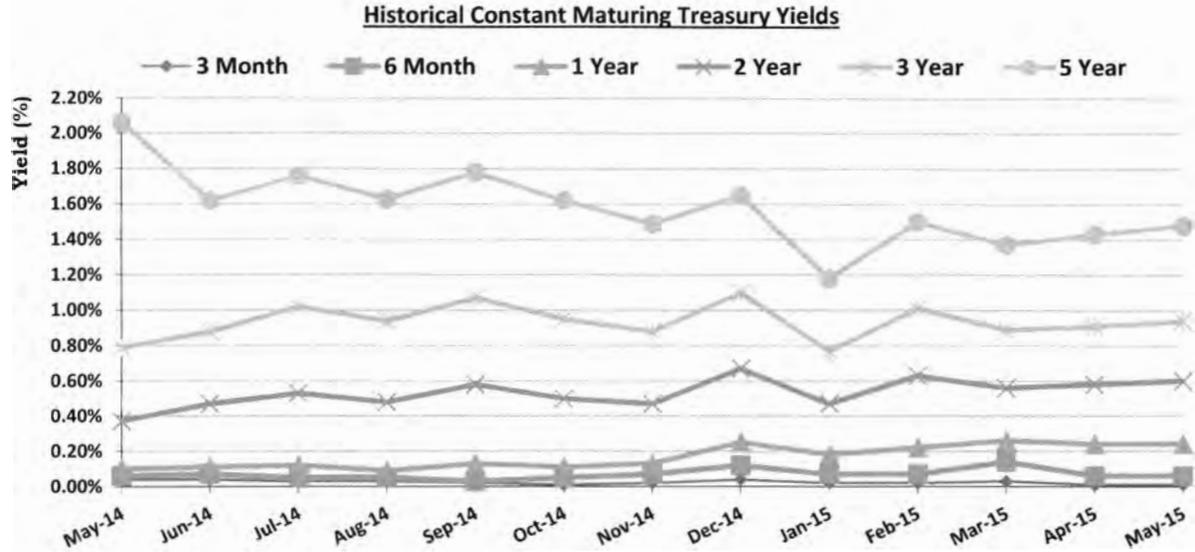

- ❖ The current goal is to keep the investment portfolio at an average maturity between 2 to 3 years based on current economic conditions. The goal was set between 2 to 3 years as a gauge to meet liquidity needs and in order to take advantage of rising interest rates. Average maturity is a moving target which is contingent upon the current state or conditions of the economy. The portfolio's current average maturity is 596 days or 1.63 years. This is a 5 day decrease from the previous month. The decline in days to maturity directly correlated to the TRAN payment set aside.
- ❖ The goal is to keep an average of \$10-\$20 million in liquid assets in order to meet operational needs and for any unexpected expenditures that may arise. The short term liquidity balance is \$41 million. The City is in compliance with California Government Code Section 53646 which requires local agency to report its ability to meet pooled expenditure requirements for the next six (6) months.

**Investment Comparison to Benchmark**

For the month of May the City's yield to maturity on pooled investments was 0.890%. The yield decreased by 12 basis points or 0.12% from the previous month. The average effective rate of return for fiscal year-to-date is 0.96%. The average yield on the 2 year U.S. Constant Maturing Treasury (CMT) was 0.610% which reflects an increase of 3 basis points or 0.03% compared to the prior month. The portfolio performed above the CMT benchmark by 28 basis points or 0.28%. As the economy improves and interest rates continue to slowly move upward the spread between the portfolio performance and the benchmark will tighten. When the short end of the yield curve begins to rise LAIF rates are also expect to trail. The graph below tracks the CMT yields for the past twelve month period for a variety of terms. The City's portfolio will stay the course based on the current economic trends. Covering cash flow needs rank as the top priority.

The Governmental Accounting Standards Board (GASB) has established Statement No. 31 for setting investment valuation standards. We report the unrealized gain/(loss) monthly and book realized gain/(loss) at year end as a GASB 31 requirement.

GASB 31 is a reporting requirement that reports the "Fair Value" of investments held in our portfolio. Fair value is the amount at which a financial instrument (investment) could be exchanged in a current transaction between willing parties at current market prices. It is important to understand the relationship between prevailing interest rates and fixed coupon investments. As market interest rates fall, the "Fair Value" of held securities will rise (unrealized Gains). The opposite occurs as market interest rates rise (market prices of held investments will fall). It should be noted that investments held in the city pool are to be held until maturity so both gains and losses (unrealized) will not be taken.
