The LAIF balance decreased by \$0.5 million and the average monthly yield was .228%. During the month of June we had 1 LAIF deposit and 3 withdrawals (activity detail on page 3 of the investment report). The LAIF (less TRAN set aside) balance as of June 30, 2014 was \$19 million. May 31, 2014 portfolio balance was \$196,414,830 and the balance as of June 30, 2014 was \$195,002,020. The total portfolio decreased by \$ 1.4 million.

Liquidity of the Portfolio

- The current goal is to keep the portfolio at an average maturity between 2 to 3 years based on current economic trends. The goal was set between 2 to 3 years as a gauge to meet liquidity needs and in order to take advantage of rising interest rates. Average maturity is a moving target which is contingent upon the current state or conditions of the economy. The portfolio's current average maturity is 803 days or 2.2 years. This is a 1 day decrease from the previous month.
- The City is in compliance with California Government Code Section 53646 which requires local agency to report its ability to meet pooled expenditure requirements for the next six (6) months. Currently, our projected cash flows for the next six months show that anticipated inflows exceed outflows in the amount of \$10.8 million excluding LAIF that has a projected average balance of \$7.8 million for the same period.
- The goal is to keep an average \$10-\$20 million in liquid assets in order to meet operational needs and for any unexpected expenditures that may arise. During the second half of the fiscal year, per TRAN requirements, we set aside 50% of the TRAN payments in January and the remaining balance in May which increases our liquidity by the amount of these payments. The upcoming TRAN payment is \$30.6 million inclusive of interest due.

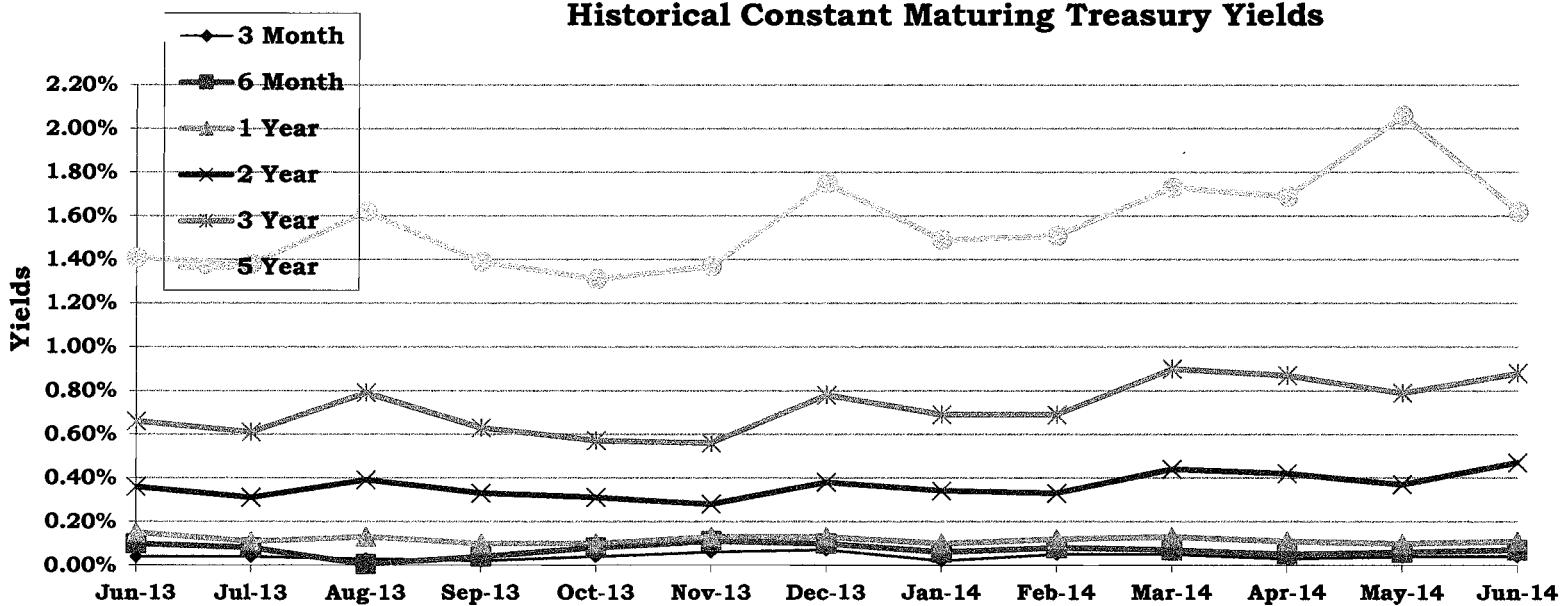

Investment Comparison to Benchmark

For the month of June the City's yield to maturity on pooled investments was .908%. The yield increased by 1 basis point or .01% from the previous month. The average effective rate of return for fiscal year-to-date is 1.04%. The average yield on the 2 year U.S. Constant Maturing Treasury (CMT) was .47% which reflects an increase of 10 basis points or .10% compared to the prior month. The portfolio performed above the benchmark (CMT) by 44 basis points or .44%. As the economy improves and interest rates continue to slowly move upward we will see the spread between the portfolio performance and our benchmark tighten. When the short end of the yield curve begins to rise we can expect LAIF rates to trail also.

Investment Report Summary Notes for June 2014

The graph below tracks the US Constant Maturing Treasury yields for the past twelve month period for a variety of terms.

Historical Constant Maturing Treasury Yields

The Torrance portfolio will stay the course based on the current economic trends. Covering cash flow needs rank as the top priority.

The Governmental Accounting Standards Board (GASB) has established Statement No. 31 for setting investment valuation standards. We report the unrealized gain/(loss) monthly and book realized gain/(loss) at year end as a GASB 31 requirement. GASB 31 is a reporting requirement that reports the "Fair Value" of investments held in our portfolio. Fair value is the amount at which a financial instrument (investment) could be exchanged in a current transaction between willing parties at current market prices. It is important to understand the relationship between prevailing interest rates and fixed coupon investments. As market interest rates fall, the "Fair Value" of held securities will rise (unrealized Gains). The opposite occurs as market interest rates rise (market prices of held investments will fall). It should be noted that investments held in the city pool are to be held until maturity so both gains and losses (unrealized) will not be taken.
