FOR IMMEDIATE RELEASE

Caltrans to Mitigate Dust and Noise on Interstate 405

TORRANCE— The California Department of Transportation (Caltrans) will be taking measures to reduce the occurrence of dust and increased levels of noise on Interstate 405 (I-405) between Western Avenue and Crenshaw Boulevard.

Water trucks will be traveling along the shoulder of I-405 twice a day to mitigate dust measures.

A temporary sound wall that will consist of sound blankets will be installed to mitigate some noise and dust during construction.

Sound blankets will be tied to a 12-foot-high fence that will be erected at the existing right of way fence location. These temporary sound blankets will be in place by mid-January starting with the north bound side at Western Avenue.

Caltrans reminds drivers to be “Work Zone Alert” and to “Slow for the Cone Zone.”
