FOR IMMEDIATE RELEASE

Interchange Improvements and New Aux Lanes

TORRANCE— The California Department of Transportation (Caltrans) will start construction on Interstate 405/Van Ness UC (I-405) for interchange improvements and new Aux Lanes. Caltrans will start necessary falsework that will limit the vertical truck clearance at Van Ness UC between 190th Street and 182nd street in the city of Torrance.

What to expect: Caltrans will start construction June 18 and will only take place during the day from 7 a.m. to 5 p.m. This falsework will limit the truck clearance at the Van Ness UC (below the I-405) to 14'-6". Truck warning signs and detours will be provided for the duration of the work. Residents and local businesses located near the freeway may experience noise, vibrations, and dust associated with construction activities. Motorists should expect delays and are strongly advised to avoid the area and use alternate routes. Additionally, motorists can check traffic conditions before they leave by visiting the Caltrans [Quickmap](https://quickmap.dot.ca.gov) (quickmap.dot.ca.gov).

What the work involves: Caltrans will limit truck access and there will be full closures when we place/remove the falsework. The contractor will also be working on the demolition of the outside of the bridge for the purpose of widening.

INFORMATIONAL NOTICE

Benefits: The combination of traffic demands from population, housing and employment growth, as well as the limited capacity of the existing facility has led to increased traffic congestion and delays throughout the I-405 corridor. The goal of this project is to improve operational conditions, reduce delays by decreasing congestion, while improving safety and implementing a long-life pavement strategy.

Closures may start and end later. Motorists should expect delays and are encouraged to check traffic conditions before leaving to their destination by visiting the Caltrans [Quickmap](#).
